Award of Electricity and Gas retail licenses

GashubUnited Holding Pte Ltd ('Gashub' or the 'The Group' is delighted to announce that its utility arm, GashubUnited Utility Private Limited ('Gashub Utility'), was successfully awarded both the Electricity and Gas retail licenses by Singapore's Energy Market Authority (EMA).

For the past 26 years, The Engineering arm of Gashub has proven itself to be a well-established gas piping specialist in Singapore. The Group has been involved in multiple high profile projects through the years such as Ion Orchard, Star Vista and Genting Hotel among many others. Additionally, the Group's technology arm was also the early pioneers of fuel cell research and development in Singapore, having completed several installations in Singapore and also capable of supporting fuel cell EPC projects that leverage on our gas expertise

As a part of the Gashub Group's continuous plan to leverage on our core skills to evolve and grow into a multi-utilities provider, Gashub has thus applied for and been awarded both of the aforementioned utility retail licenses.

Being one of 7 entities holding both the gas and electricity retail licenses, Gashub is committed to providing an integrated source for round the clock reliable, cleaner and cheaper utilities in the market with a focus on materialising real combined utility cost savings to industries that consume a significant amount of gas and electricity every month. Do watch out for more updates as we prepare for our expected roll out in 2018
